PROFILE

Full-stack web developer with 7 years at Central Luzon State University building and maintaining live information systems in Laravel, PHP, MySQL, Next.js and TypeScript, including a real-time monitoring system used by all member universities of the CLAARRDEC research consortium. Ships end to end, from database design to deployed UI, and works fast across stacks with AI-assisted development in Claude Code. Brings data engineering (PostgreSQL, Kimball modeling, dbt), IoT control systems, published research and a teaching background. Currently completing an MS in IT (Data Science). Remote-ready, with strong written English and a structured, detail-focused approach.

SKILLS

Full-stack web	PHP, Laravel, JavaScript, TypeScript, Next.js, React, Tailwind CSS, Supabase, REST APIs, HTML/CSS
Databases & data	MySQL, PostgreSQL (row-level security, materialized views, window functions, CUBE/ROLLUP), Kimball dimensional modeling, SCD Type 2, Python ETL, dbt Core
AI-assisted dev & automation	Claude Code, Codex, Gemini, GitHub Copilot; n8n email automations, webhooks and bots
IoT & GIS	ESP32, Arduino, PlatformIO, Python sensor control systems; ArcGIS, QGIS
Tools & delivery	Git, GitHub, GitHub Actions CI, Vercel, XAMPP; requirements gathering, technical documentation, stakeholder coordination

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer 2026–present
Independent and collaborative product work

- Building web applications and automation workflows with Next.js, Laravel and Supabase.

Instructor I, Department of Information Technology Aug 2019–Jun 2026
Central Luzon State University, Science City of Muñoz, Philippines
Also designated to the Crops and Resources Research and Development Center (CRRDC); Information and Communication Division Head, Jul 2024–Dec 2025.

- Co-developed the CLAARRDEC Real-Time Monitoring System (rtms.clsu.edu.ph) in Laravel, PHP and MySQL, used by all member State Universities and Colleges of the regional R&D consortium.
- Built the CRRDC enterprise information system (crrdc.vercel.app) in Next.js, React, TypeScript, Tailwind CSS and Supabase (PostgreSQL) with role-based access control, and the CLAARRDEC CMS and e-library in Laravel and MySQL.
- Lead developer for IoT smart indoor-farming systems (ESP32, Arduino, sensors, Python): automated evaporative cooling, fertigation, light and climate monitoring and retractable solar panels, with a real-time monitoring web app.
- Led the CRRDC Information and Communication Division (1 of 4 divisions), turning R&D outputs into databases, knowledge products and ICT-based innovations.
- Taught web and Java programming, media and business courses to 150–250 students per semester; designed outcomes-based curriculum and mentored student capstone system-development teams.

Project Technical Staff Jul 2017–Jul 2019
Central Luzon State University, Science City of Muñoz, Philippines
CHED–British Council Joint Development of Niche Programmes through Philippine–UK Linkages (JDNP).

- Managed project documents and correspondence, and monitored fund utilization.
- Prepared work, financial and accomplishment reports for project stakeholders.

PROJECTS

CLAARRDEC Real-Time Monitoring System (RTMS) — Laravel · PHP · MySQL
rtms.clsu.edu.ph

- Shared R&D project reporting and oversight, used by all member State Universities and Colleges of the CLAARRDEC consortium. Co-developer of the monitoring and reporting workflows.

CRRDC Enterprise Information System — Next.js · Supabase
crrdc.vercel.app · github.com/sardinexszc/crrdc

- A single platform for research, extension, personnel and administrative records, with role-based access control for each team. Built end to end: requirements, database design, access control and deployment.

Disaster Response Intelligence Warehouse — PostgreSQL · Python · dbt

- PostgreSQL 17 data warehouse unifying multi-agency Philippine disaster data: Kimball model with 4 star schemas and 9 conformed dimensions, Python and dbt Core ETL, 36 data-quality rules that caught all 19 planted defect types, materialized views that made dashboard queries 78x faster, row-level security, 99+ dbt tests and Next.js dashboards.

Smart Indoor Farming IoT System — ESP32 · Arduino · Python
smart-indoor-farming-website.vercel.app

- Automated evaporative cooling, fertigation, light and climate monitoring and retractable solar panels, with a real-time monitoring web app. Lead developer for the sensor control systems and the web app.

CLAARRDEC Website, CMS and E-Library — Laravel · MySQL

- Public website and e-library with controlled access, administration and usage reporting.

Portfolio and Analytics Platform — Next.js · Supabase
ivansalinas.vercel.app · github.com/sardinexszc/SardinexszcPortfolio

- Server-rendered portfolio with a private analytics dashboard, admin sign-in and rate-limited tracking APIs (Next.js, TypeScript, Supabase). Lighthouse 100 for accessibility on mobile and desktop.

TCEHub — Next.js · TypeScript
tcehub-alpha.vercel.app · github.com/sardinexszc/tcehub

- Mobile-first community site for the Toyota Camry Elite community: filterable, paginated shop directory, journals, events and galleries (Next.js, TypeScript, Tailwind CSS).

EDUCATION

MS Information Technology, major in Data Science — Feb 2026–present
Nueva Ecija University of Science and Technology, Philippines

- In progress, expected 2027–2028. Coursework includes Enterprise Data Warehousing.

BS Information Technology, major in Systems Development — 2013–2017
Central Luzon State University, Science City of Muñoz, Philippines

- Capstone: “CLSU Open University Student Academic Information Monitoring and Record Keeping System” (C# desktop application, MySQL).
- 300-hour OJT at CLSU Open University (web development, portal updates), commended for excellent performance.

PUBLICATIONS

INTELLECTUAL PROPERTY

- Registered software copyrights N2026-331 to N2026-335 (5 programs): smart indoor-farming control software, National Library of the Philippines, 2026 (co-author).
- Published patent application (named inventor): “Automated Vitamins and Antibiotics Injection System for Broiler Production”, PH 12023050744 (published 2025).
- Registered copyright: “Solar Grow” and “Ang Solar Grow” brochures.
- Pending team filings (smart indoor farming): 1 software copyright, 2 documentation copyrights, 4 utility models, 1 patent application (Solar-Powered Elevated Pots).

TRAINING AND CERTIFICATES

- Advanced GIS Applications for Agricultural Resources Management (5-day workshop), DOST-PCAARRD, Oct 2025.
- Fundamentals of GIS (3-day workshop), DOST-PCAARRD, Nov 2024.
- Flexible Learning Systems Training Course, Central Luzon State University, Jul 2020.
- Intercultural Fluency Essentials, British Council, Jan 2018.
- Networking Fundamentals (2016) and C# Fundamentals (2015), Microsoft Virtual Academy.

LANGUAGES

- Filipino (native); English (C2 written, OnlineJobs.ph English test; B2 spoken).
