SUMMARY

Full-stack web developer with 7 years at Central Luzon State University building and maintaining live information systems in Laravel, PHP, MySQL, Next.js and TypeScript, including a real-time monitoring system used by all member universities of the CLAARRDEC research consortium. Ships end to end, from database design to deployed UI, and works fast across stacks with AI-assisted development. Remote-ready, with strong written English and a structured, detail-focused approach.

SKILLS

Full-stack web	PHP, Laravel, JavaScript, TypeScript, Next.js, React, Tailwind CSS, Supabase, REST APIs, HTML/CSS
Databases & data	MySQL, PostgreSQL (row-level security, materialized views, window functions, CUBE/ROLLUP), Kimball dimensional modeling, SCD Type 2, Python ETL, dbt Core
AI-assisted dev & automation	Claude Code, Codex, Gemini, GitHub Copilot; n8n email automations, webhooks and bots
IoT & GIS	ESP32, Arduino, PlatformIO, Python sensor control systems; ArcGIS, QGIS
Tools & delivery	Git, GitHub, GitHub Actions CI, Vercel, XAMPP; requirements gathering, technical documentation, stakeholder coordination

EXPERIENCE

Full-Stack Web Developer 2026–present
Independent and collaborative product work

- Building web applications and automation workflows with Next.js, Laravel and Supabase.

Instructor I, Department of Information Technology Aug 2019–Jun 2026
Central Luzon State University, Science City of Muñoz
Also designated to the Crops and Resources Research and Development Center (CRRDC); Information and Communication Division Head, Jul 2024–Dec 2025.

- Co-developed the CLAARRDEC Real-Time Monitoring System (rtms.clsu.edu.ph) in Laravel, PHP and MySQL, used by all member State Universities and Colleges of the regional R&D consortium.
- Built the CRRDC enterprise information system (crrdc.vercel.app) in Next.js, React, TypeScript, Tailwind CSS and Supabase (PostgreSQL) with role-based access control, and the CLAARRDEC CMS and e-library in Laravel and MySQL.
- Lead developer for IoT smart indoor-farming systems (ESP32, Arduino, sensors, Python): automated evaporative cooling, fertigation, light and climate monitoring and retractable solar panels, with a real-time monitoring web app.
- Led the CRRDC Information and Communication Division (1 of 4 divisions), turning R&D outputs into databases, knowledge products and ICT-based innovations.
- Taught web and Java programming, media and business courses to 150–250 students per semester; designed outcomes-based curriculum and mentored student capstone system-development teams.

Project Technical Staff Jul 2017–Jul 2019
Central Luzon State University · CHED–British Council JDNP

- Managed project documents and correspondence, and monitored fund utilization.
- Prepared work, financial and accomplishment reports for project stakeholders.

SELECTED PROJECTS

- **Disaster Response Intelligence Warehouse:** PostgreSQL 17 Kimball warehouse (4 star schemas) for multi-agency Philippine disaster data; Python and dbt Core ETL with 36 data-quality rules and 99+ tests; materialized views made dashboard queries 78x faster.
- **Portfolio and Analytics Platform** (ivansalinas.vercel.app): Next.js and Supabase site with a private analytics dashboard and rate-limited tracking APIs; Lighthouse 100 accessibility.
- **TCEHub** (tcehub-alpha.vercel.app): mobile-first community site with a filterable shop directory, journals, events and galleries.
