Full-stack software engineer

PROFILE

I build web applications, research information systems, and automation for institutional teams. My work spans requirements, database design, development, and deployment.

SKILLS

Web: React, Next.js, TypeScript, JavaScript, PHP, Laravel
Data and APIs: MySQL, PostgreSQL, Supabase, SQL, REST APIs
Automation and delivery: n8n, webhooks, Git, GitHub, Vercel

EXPERIENCE

Full-Stack Web Developer 2026–Present
Independent and collaborative work

- Build web applications, databases, and automation workflows with Next.js, Laravel, and Supabase.

Researcher, Instructor & Information Systems Developer 2019–2026
Central Luzon State University

- Delivered research information, monitoring, and content systems for institutional projects.
- Led small teams and worked with researchers and administrators to define requirements and coordinate delivery.
- Taught undergraduate programming and supervised software development capstone projects.

Project Technical Staff 2017–2019
Central Luzon State University

- Maintained project records and technical reports; supported requirements gathering and team coordination.

SELECTED PROJECTS

CRRDC web platform: Research, extension, personnel, and administrative records in one system.
CLAARRDEC monitoring: Shared project reporting and oversight across member institutions.
CLAARRDEC CMS / E-Library: Public content, controlled access, and usage reporting.

EDUCATION

MS Information Technology, Data Science — Nueva Ecija University of Science and Technology (2026–Present)
BS Information Technology, Systems Development — Central Luzon State University (2013–2017)
