PROFESSIONAL SUMMARY

Full Stack Software Engineer and AI Automation Specialist with 7+ years of experience designing, developing, and deploying enterprise-grade web applications and automated workflows. Proficient in building scalable, cloud-based solutions using React.js, Next.js, PHP, TypeScript, and PostgreSQL. Expert in integrating Large Language Models (LLMs), n8n automation, and Telegram bots to solve complex operational challenges. Proven track record of leading the full Software Development Life Cycle (SDLC) for research institutions, translating business requirements into efficient, data-driven information systems.

SKILLS

- PHP, JavaScript (ES6+), TypeScript, SQL, Java
- React.js, Next.js, HTML5, CSS3, Responsive Web Design, Tailwind CSS
- RESTful API Development, Server-side Application Dev, Authentication and Authorization, API Integration
- MySQL, PostgreSQL, Supabase, Database Design, Data Modeling
- Vercel, Git, GitHub, Cloud Application Deployment
- Workflow Automation(n8n), AI Agent integration, LLM Integration, API Orchestration, Prompt Engineering, Telegram BOT Development, Webhook Integration
- Artificial Intelligence Workflow Automation, Internet of Things (IoT), ArcGIS, QGIS

EXPERIENCE

Central Luzon State University - Crops and Resources Research and Development Center, Information and Communication Division August 2019 – June 2026

Instructor I | Information Systems Developer

- Taught undergraduate programming courses and supervised software development capstone projects.
- Developed and maintained a multi-module enterprise information system supporting research management, inventory, personnel, document management, and organizational services for the Crops and Resources Research and Development Center (CRRDC).
- Led the complete Software Development Life Cycle (SDLC), including requirements gathering, system design, database architecture, development, testing, deployment, maintenance, and user support.
- Designed relational databases using MySQL, PostgreSQL, and Supabase, and developed secure RESTful APIs for integration with internal and third-party services.
- Implemented workflow automation using n8n and integrated AI-powered solutions, LLMs, webhooks, chatbots, and external APIs to improve operational efficiency.
- Collaborated with researchers, administrators, and multidisciplinary teams to translate operational requirements into scalable software solutions while mentoring interns and student developers

Central Luzon State University July 2017 – June 2019

Project Technical Staff

- Managed project documentation, financial records, and technical reports for a CHED–British Council research initiative.
- Coordinated project documentation, monitored fund utilization, and ensured compliance with project reporting requirements.
- Prepared technical, financial, and accomplishment reports while supporting project administration and stakeholder coordination.

EDUCATION

Master of Science in Information Technology

Major: Data Science
Nueva Ecija University of Science and Technology
2026 - present

Bachelor of Science in Information Technology

Major: Systems Development
Central Luzon State University 2013 - 2017
